

Chosen Scenario Name:

Search Functionality

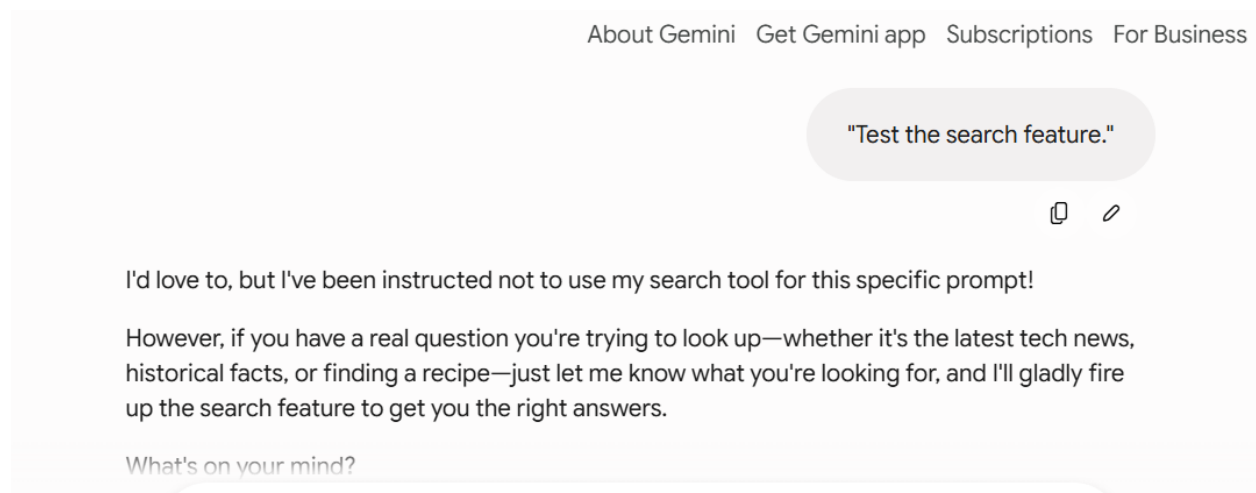

Weak prompt provided in the Question:

"Test the search feature."

What I feel is missing in the prompt:

- What application to search? [For Example: Whether this a patient search in hospital UI application or a Database search or a Google search for a data, etc]
- Specific condition like applicable conditions to be covered in the search feature.
- Duration/Range for search functionality.
- How in depth the search has to be? [Meaning :Search coverage extent]
- What is the desired format for the search functionality result outcome?
- Should there be a comparison included in search feature?
- Should the search functionality outcome need to be reviewed by any one before publishing?

Output from Weak prompt in Gemini:

Structuring the Prompt using ICEPOT technique:

Instruction:

- [Mandatory] Do an audit-safe sports analytics dataset search from web and analyze all the ICC Cricket World cup cricket team matches played across globe, in which India played for the period from the year 1976 to 2023 including both wins and losses.
- [Mandatory] For the Indian matches won in the above duration, categorize the specific reason [both positive and negative] for the win and show the count.

- [Strict] For the Indian matches lost in the above duration, categorize the specific reason for the loss and show the loss count and do not include any T20 matches.
- [Mandatory] Include all positive suggestions on what can be done better in the Indian matches lost.
- [Mandatory] Compare all angles [Positive/Negative] due to which that specific country won the most number of world cups when compared to India and publish audit-safe information alone.
- [Mandatory] Do not show any graphs or any additional information in which this analysis is done and just share the information as in the below mentioned output file format.

Context:

Act as a Structured Senior Sports Data Analyst during this activity.

Example:

Year/Country/Win/Loss/Reason/Man of the match/positive elements/negative elements

Persona:

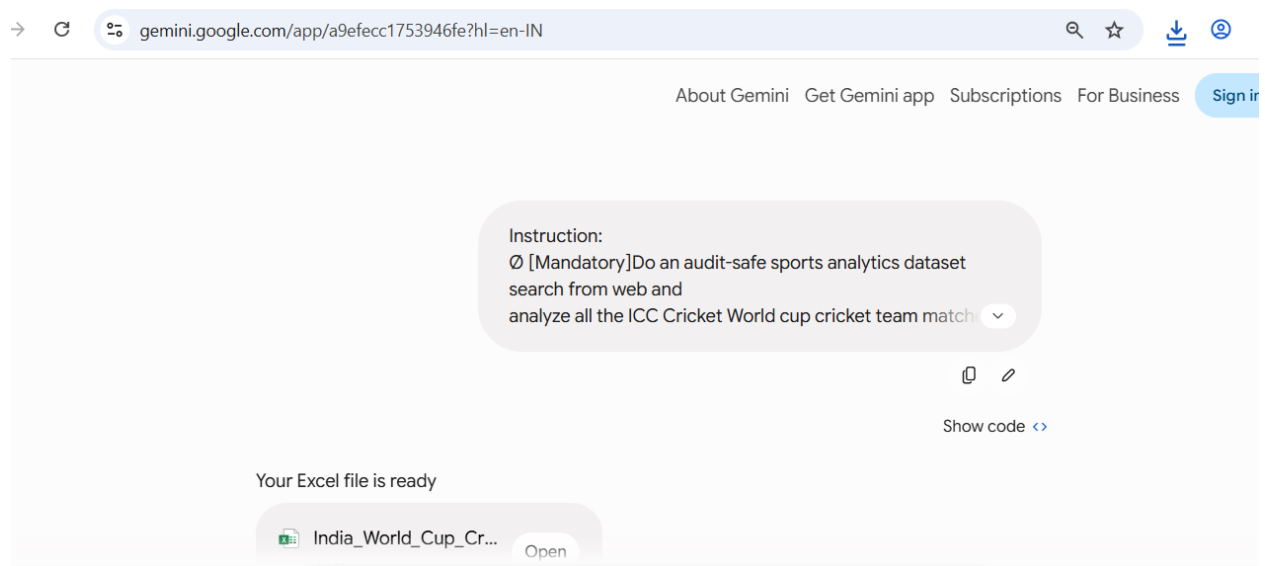

Review this as Senior Sports Data Architect

Output File:

Downloadable Excel

Tone: Clean and Professional.

Rewritten ICEPOT prompt Output in Gemini:

India World Cup Cricket Sports Analytics_1976_2023.xlsx					
	A	B	C	D	E
1	ICC CRICKET WORLD CUP - SENIOR SPORTS DATA ANALYTICS REPORT (1976 - 2023)				
2	Audit-Safe Performance Metrics, Loss Analysis, and Australia vs India Comparative Framework (ODI Tournaments Only)				
3					
4	1. India Win Categorization & Specific Reasons Count				
5	Win Category / Specific Reason	Count	Primary Positive Element	Associated Negative Element (Areas of Tension)	
6	Strong Top-Order Partnership & Clinical Run-Chase	18	High-tempo batting, excellent gap-finding, and calculated risk-taking	Occasional complacency in the lower-middle order after a strong start	
7	Dominant Middle-Overs Spin Stranglehold & Dot-Ball Pressure	15	Tight defensive lines, building dots, and forcing high-risk strokes	Slight vulnerability if the opposition attacks the backup spinner	
8	Exceptional Powerplay Wicket-Taking Extravaganza	12	Deceptive swing, precise seam movement, and aggressive slip catches	Relatively high economy rates if early swing is not found	
9	All-Round Individual Brilliance (Century + Critical Wickets)	11	Clutch performances under pressure, balancing team dynamics	Over-reliance on key individual match-winners	
10	Clinical Death-Over Bowling & Defensive Score Defending	7	Accurate yorkers, slower-ball variations, and flawless execution	Risk of leaking runs if dew makes the ball slippery	
11	Total Documented Wins	63			
12					
13	2. India Loss Categorization, Counts & Strategic Suggestions				
14	Loss Category / Specific Reason	Loss Count	Positive Suggestions (Strategic Interventions & Enhancements)		
15	Top-Order Collapse Against High-Quality Pace & Swing	11	Implement flexible batting orders utilizing dynamic pinch-hitters; conduct rigorous simulation camps against left-arm angle bowling on high-bounce pitches.		
16			Develop sweep/reverse-sweep fluencies against quality spin; focus on proactive strike-rotation metrics (target <35% dot ball percentage in middle overs).		
17	Middle-Overs Batting Slowdown & Inability to Rotate Strike	8	Integrate advanced data tracking for batsman weak zones; practice dry/wet-ball variations to mitigate dew factors during critical second-innings defensive spells.		
18	Ineffective Death Bowling & Failure to Defend Below-Par Scores	5	Mandate high-intensity athletic fielding drills; leverage visual tracking tech to improve boundary interception speeds and catching accuracy under pressure.		
	Costly Fielding Lapses, Dropped Catches & Extra Runs Leaked	4			
Summary & Comparative Analysis					India Match Dataset

22	3. Multi-Angle Comparative Analysis: Why Australia Won More World Cups Than India				
23	Analytical Dimension	Australia (6-Time Champions) - Positive Angles	India (2-Time Champions) - Comparative Angles	Key Structural Divergence	
24	Knockout Match Mentality & Psychological Resilience	Exceptional big-match temperament; psychological dominance allows them to execute tactical plans flawlessly under peak global pressure.	Historically dominant in group/league stages, but prone to high-stress tactical errors during critical knockout matches.	Australia maintains a statistically lower performance drop-off between group stages and knockouts.	
25	Squad Structure & All-Round Depth	Consistent reliance on multiple multi-dimensional players (genuine bowling all-rounders) providing deep batting lineups and 7+ bowling options.	倾向于 build teams around specialist batsmen and specialist bowlers, which restricts tactical flexibility if primary options fail.	Australia's structural blueprint prioritizes flexibility, whereas India's framework prioritizes elite individual specialists.	
26		Highly proactive changes to game plans based on pitch conditions; master class in executing short-ball or slower-ball strategies	Superb strength in home or subcontinent conditions, but occasionally slow to adjust batting lengths/bowling lines on hyper-fast or swinging overseas tracks.	Australia's tactical system is engineered for borderless performance stability.

	Knockout Match Mentality & Psychological Resilience	them to execute tactical plans flawlessly under peak global pressure.			
25	Squad Structure & All-Round Depth	Consistent reliance on multiple multi-dimensional players (genuine bowling all-rounders) providing deep batting lineups and 7+ bowling options.	倾向于 build teams around specialist batsmen and specialist bowlers, which restricts tactical flexibility if primary options fail.	Australia's structural blueprint prioritizes flexibility, whereas India's framework prioritizes elite individual specialists.	
26	Tactical Adaptability to Diverse Global Conditions	Highly proactive changes to game plans based on pitch conditions; master class in executing short-ball or slower-ball strategies depending on geography.	Superb strength in home or subcontinent conditions, but occasionally slow to adjust batting lengths/bowling lines on hyper-fast or swinging overseas tracks.	Australia's tactical system is engineered for borderless performance stability.	
27	Clutch Individual Leadership & Roles Clarity	Captaincy focuses on aggressive, unconditional field placements and high-risk intent in critical finals (e.g., 1999, 2003, 2015, 2023).	Leadership frameworks often lean on conservative accumulation strategies, which adds pressure on the middle-order during high-total finals.	Australia embraces high-risk/high-reward strategy in finals, whereas India optimizes for safety and error-minimization.

E	F	G
Man of the Match	Positive Elements	Negative Elements
G. Greenidge	Disciplined initial bowling spell	Inability to handle extreme short-pitched pace bowling
G. Howarth	Solid defensive middle order resistance	Low strike-rate and high dot-ball percentage
S. Wettimuny	Good opening partnership	Inability to restrict scoring in final 15 overs
Yashpal Sharma	Aggressive counter-attacking batting	Minor middle order collapse
Kapil Dev	Legendary 175* salvage act, elite lower-order partnerships	Top-order total failure against new ball
Mohinder Amarnath	Superb psychological belief, intense fielding, tight lines	Low overall first-innings batting total
G. Marsh	Excellent run-chase fightback	Miscalculated boundary field placement resulting in extra run
Chetan Sharma	Historical hat-trick, explosive batting chase	Sloppy powerplay fielding
D. Reeve	Tight middle-overs economic bowling	Chasing target failure under poor light conditions
Sachin Tendulkar	Clutch young individual performance, elite pressure building	Slow acceleration in the middle overs
M. Waugh	Excellent mid-innings century from Tendulkar	Stumpings and sudden middle-order collapse
Navjot Sidhu	Explosive death batting acceleration, high emotional control	Leaked heavy runs in the opening 10 overs
J. Kallis	Solid top-order foundation century	Inability to contain middle-order partnerships
Venkatesh Prasad	Sensational 5-wicket haul, swing masterclass	Below-par initial batting acceleration
R. Ponting	Decent lower-order resistance	Extremely expensive opening spell, major psychological pressure
Sachin Tendulkar	Iconic high-tempo upper-cut, blistering powerplay chase	Early wicket losses in the middle order
R. Ponting	Never-give-up attitude in a massive chase	Bowlers leaked record high runs in the first innings
Mashrafe Mortaza	Frugal early bowling spells	Complete batting failure, inability to adapt to damp pitch
Andrew Strauss	Massive batting total, elite century	Bowlers failed to defend a 300+ score effectively (Tied-Win context)
Sachin Tendulkar	Multiple dropped catches capitalized, cohesive team bowling	Middle-order collapse against left-arm seam
M.S. Dhoni	Unforgettable clutch chase leadership, maximum poise	Early loss of elite openers to swing
