

Chosen Scenario Name:

Dashboard / Report Generation

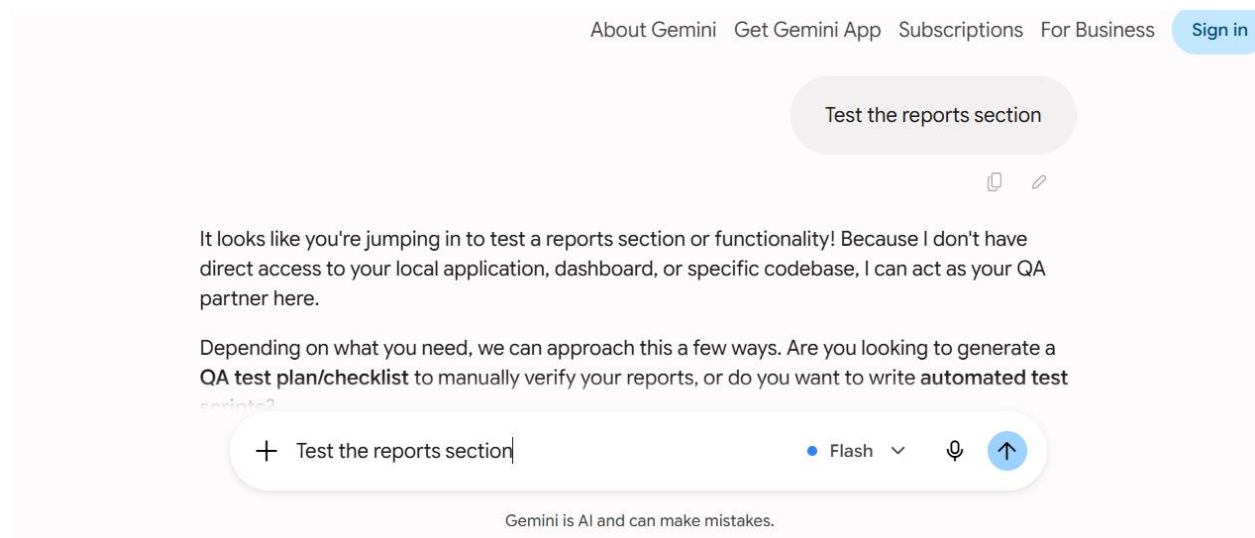

Weak prompt provided in the Question:

"Test the reports section."

What I feel is missing in the prompt:

- What application dashboard report to be generated?
- Specific condition like applicable filters to be covered in the reports generation section.
- Duration/Range for report generation functionality.
- Context coverage extent? [Meaning : coverage extent]
- What is the desired file format for report?
- Should there be a comparison included in report generation?
- Should the report generation functionality outcome need to be reviewed by any one before publishing?

Output from Weak prompt in Gemini:

Structuring the Prompt using ICEPOT technique:

Instruction:

- [Mandatory] Cover the sales of all groceries, utensils, furniture in the dashboard report generated from the retail supermarket.
- [Mandatory] Include the small cosmetics items sales as well but not any electronic items.
- [Strict] Do not show any code and include transaction sales in INR only.
- [Mandatory] Include all positive test case and negative test case scenarios

- [Strict]Report generation duration is from 2022 to 2025 and include all return bills while calculating the sales report generation
- [Mandatory]Include all boundary test case and negative test case scenarios.
- [mandatory]Report has to be generated in a proper output format as mentioned below.

Context:

Act as a Quality Assurance Analyst and include all the test scenarios for report generation in QA environment.

Example:

Test Case id /Test Case Name/Pre-Requisites/Environment/Description/Steps/Expected Result

Persona:

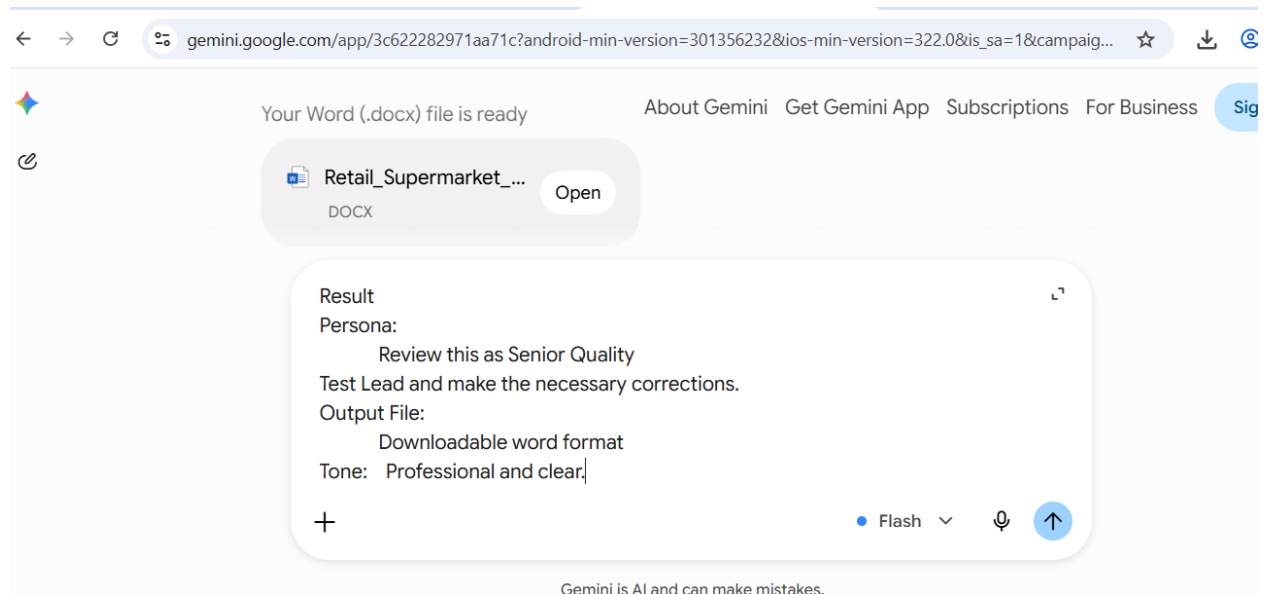

Review this as Senior Quality Test Lead and make the necessary corrections.

Output File:

Downloadable word format

Tone: Professional and clear.

Rewritten ICEPOT prompt Output in Gemini:

Prompt output document attached below

Report Generation
output from ICEPOT p

3 observations on what improved between Old prompt and new and why?

S.NO	Output Observations in Weak prompt-Old	Output Observations in ICEPOT prompt-New
1	Generic and irrelevant data for reports retrieved by user due to no context and not providing required instructions	Exact relevant test cases for report generation from dashboard acquired by user through setting proper context and providing required information
2	Inaccurate output information retrieved and no boundary value testing due to weak prompt	Accurate and desired test case output including boundary value testing for sales report generation received due to detailed prompt
3	Outcome is published without any review and not in desired format.	Outcome is reviewed and published in desired file format.
