

Home Assignment:

Install the mongodb MCP in VS code extension by searching type @mcp Mongoddb

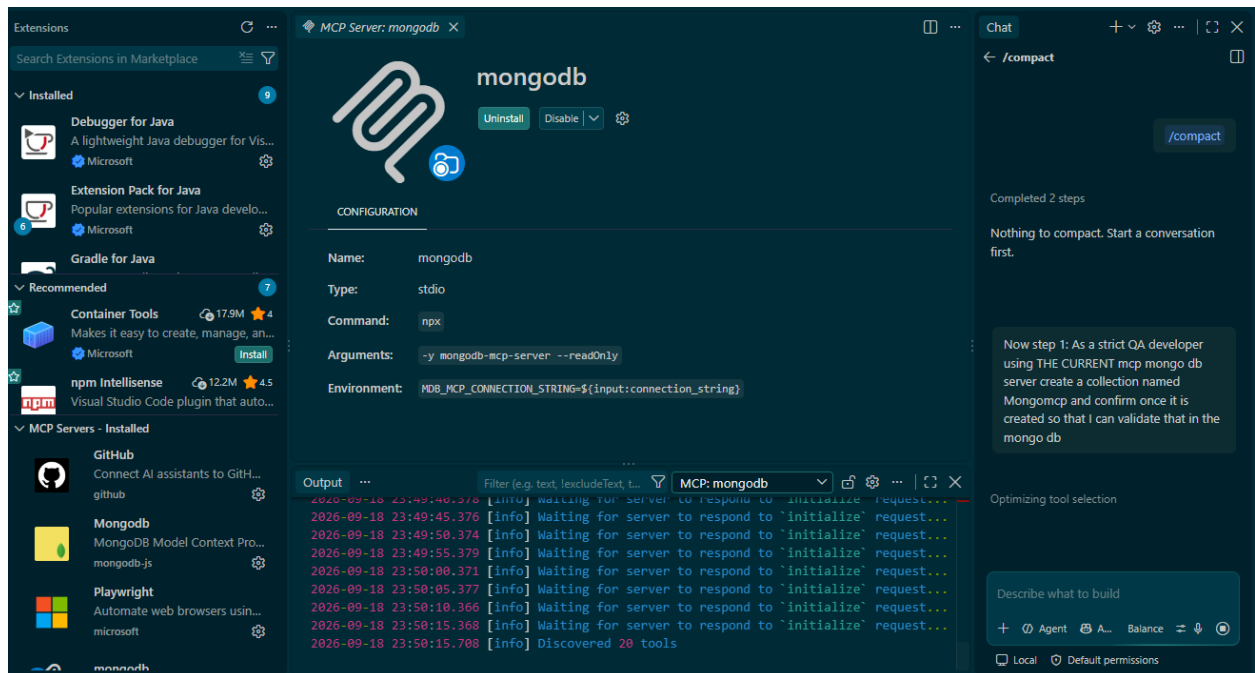

Use mongoDB MCP and perform below actions

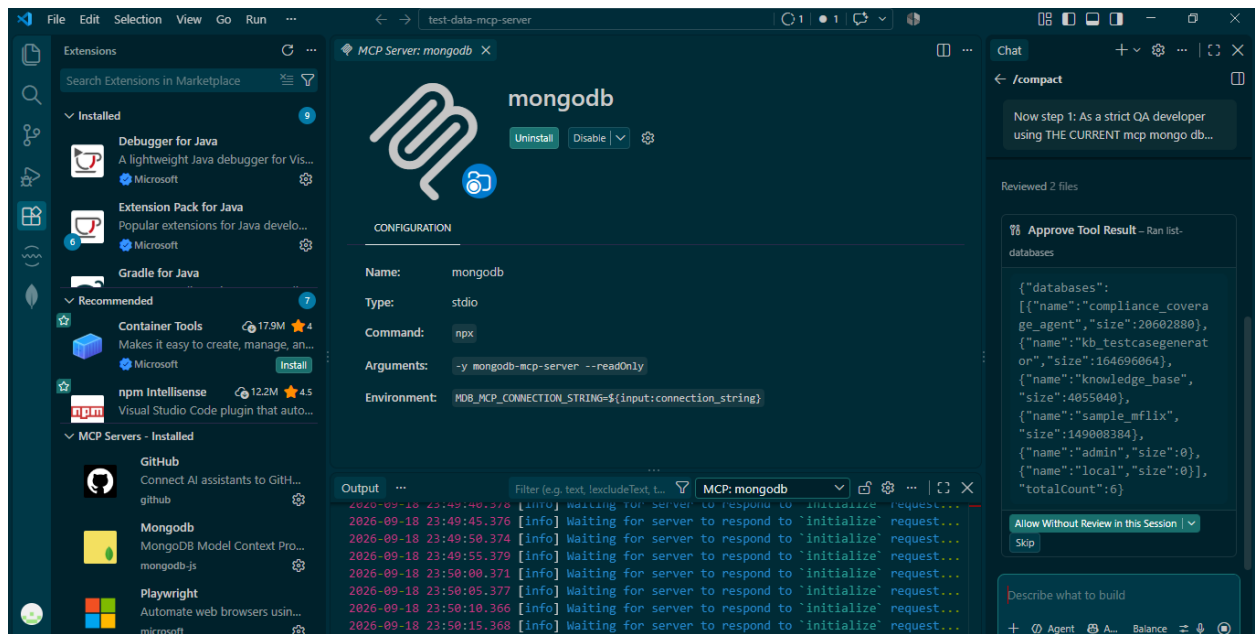

- 1.Connect to MongoDB
 - 2.Create a collection
 - 3.Drop a collection
 - 4.List a collection
 - 5.List a database
- 1.Connect to MongoDB

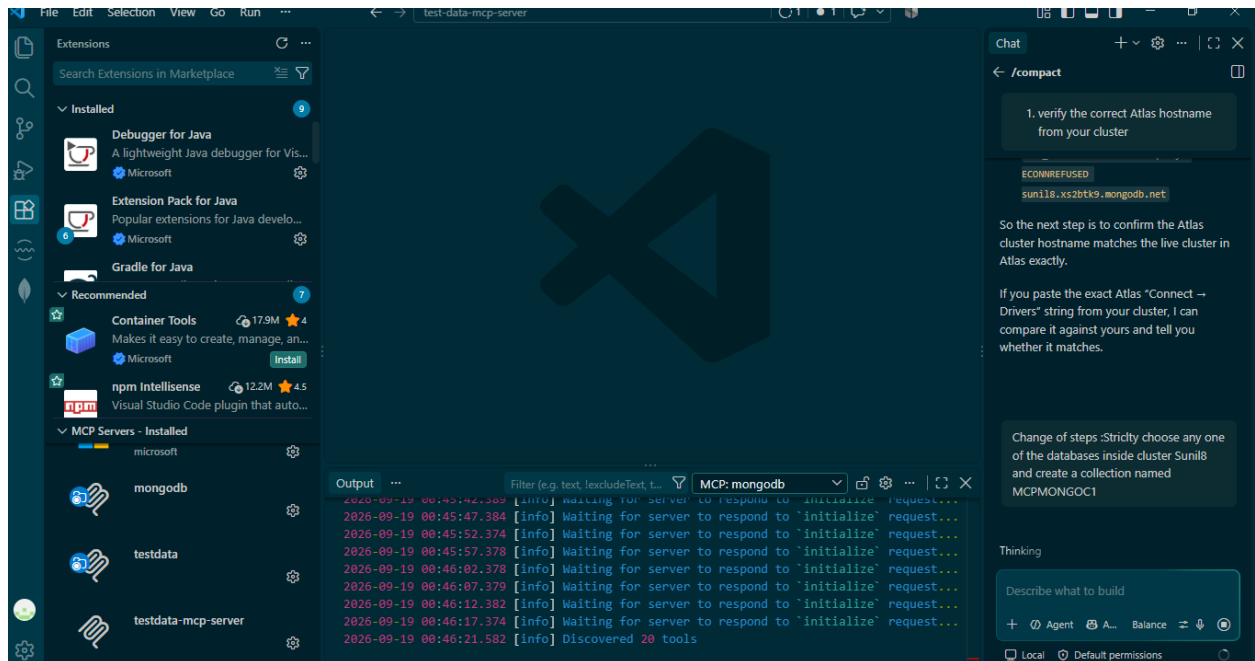

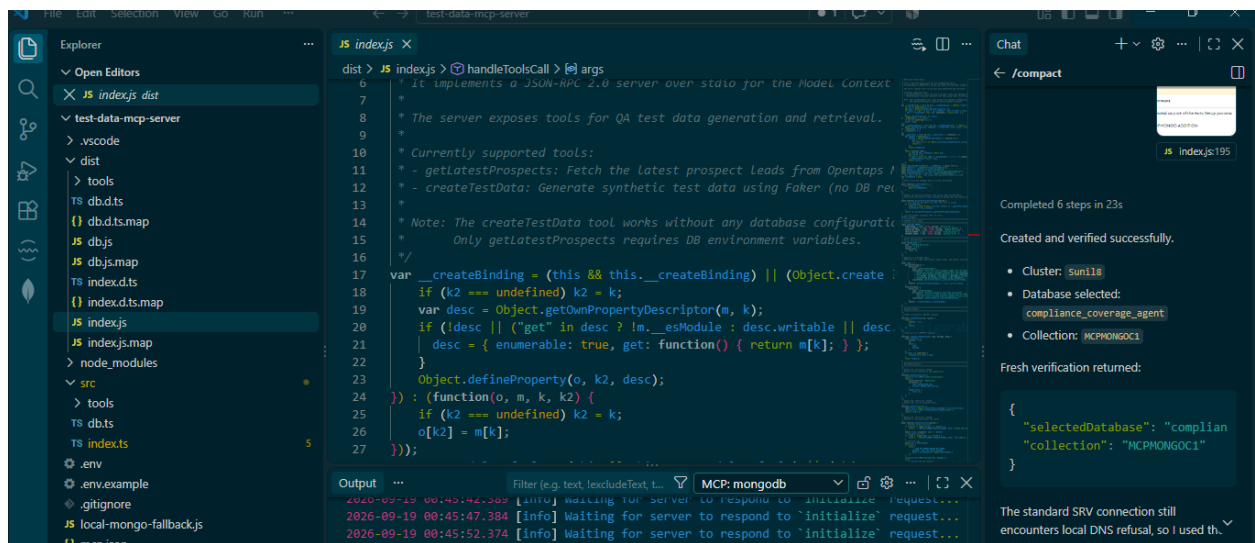

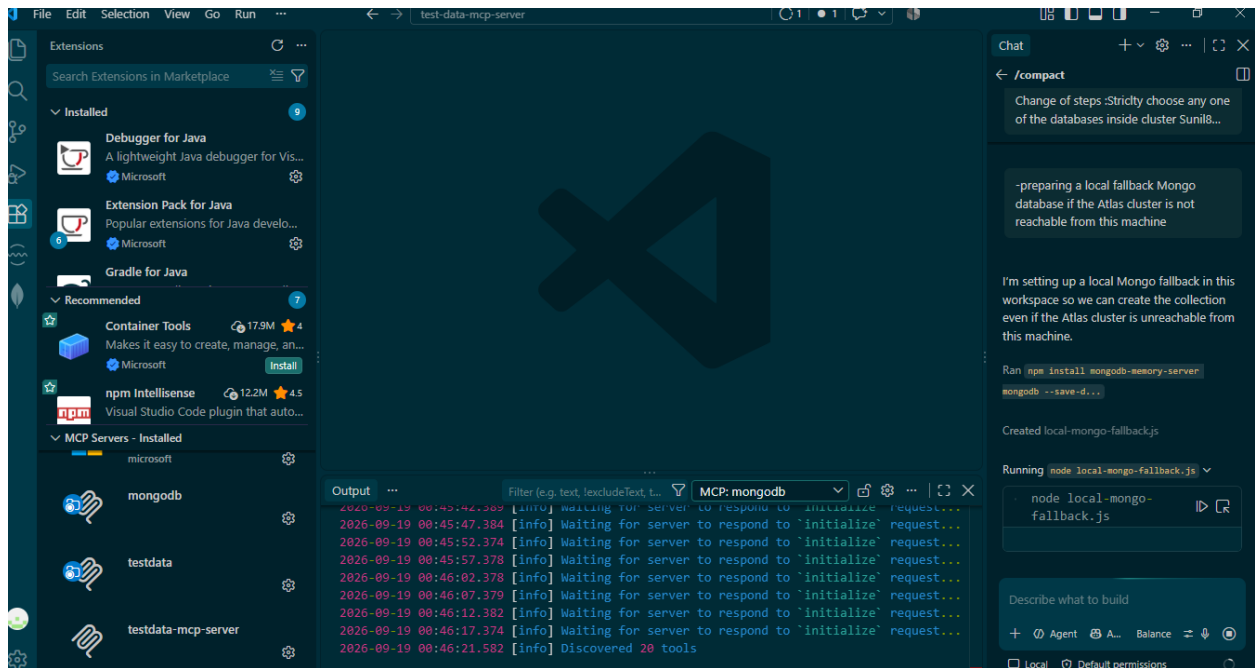

Successfully started the server .Now proceeding with steps

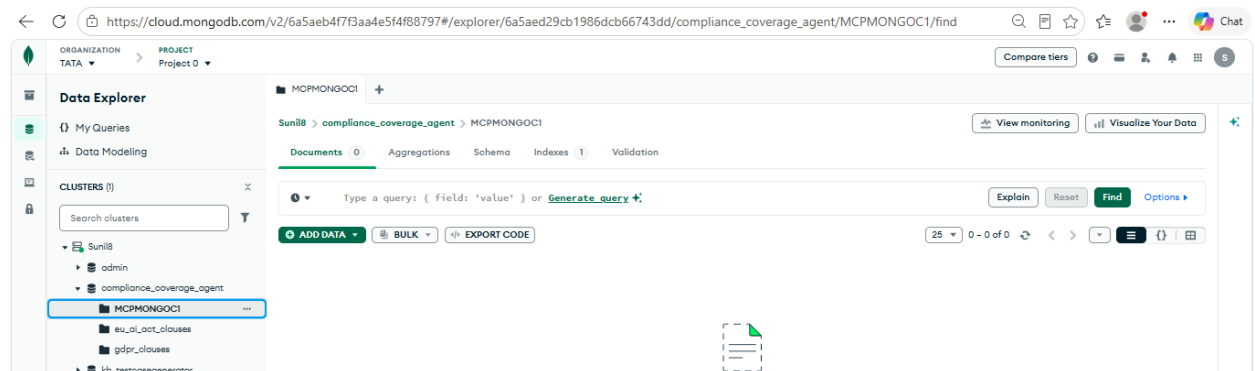

2. Create a collection named MCPMONGOC1 inside any database

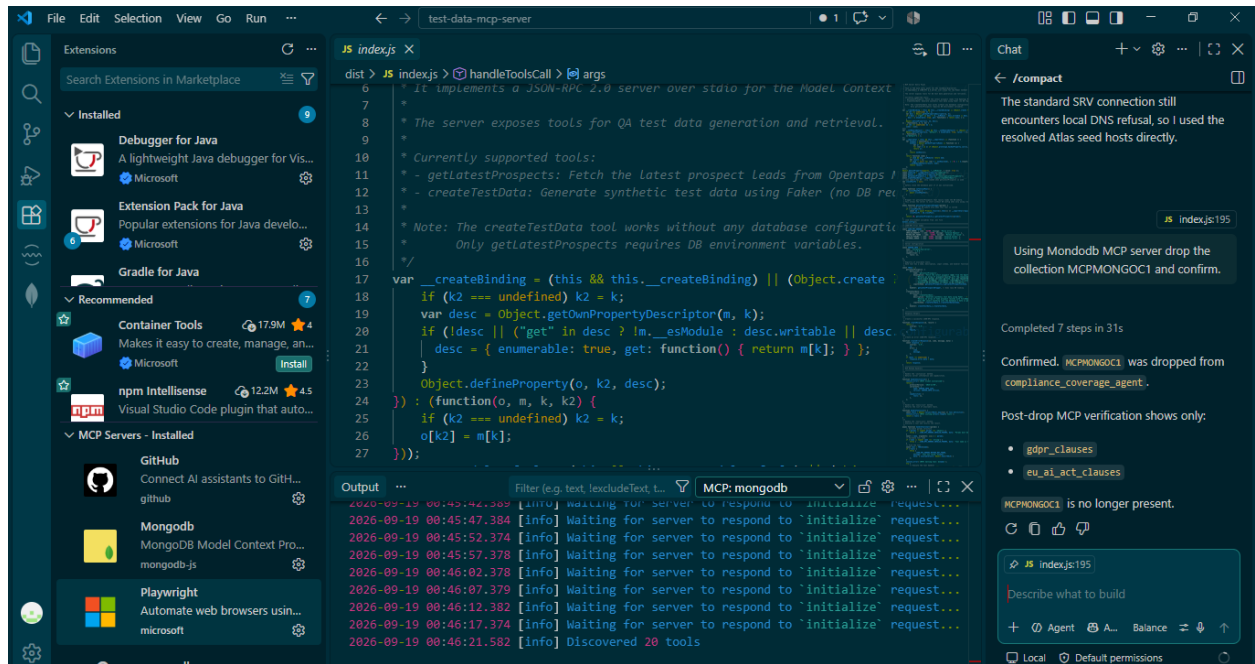

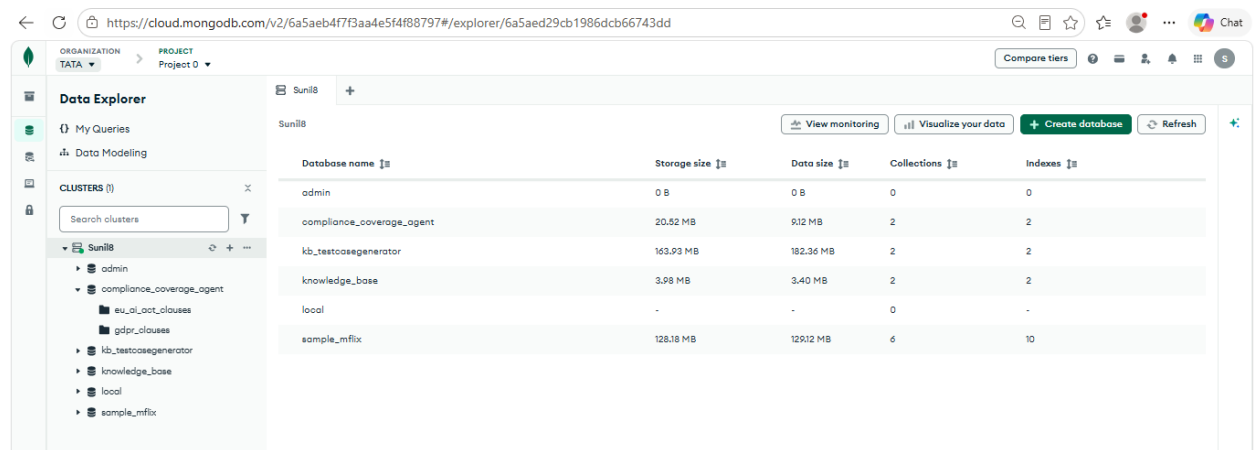

Now manually verifying in mongo db and could see new collection created MCPMONGOC1.

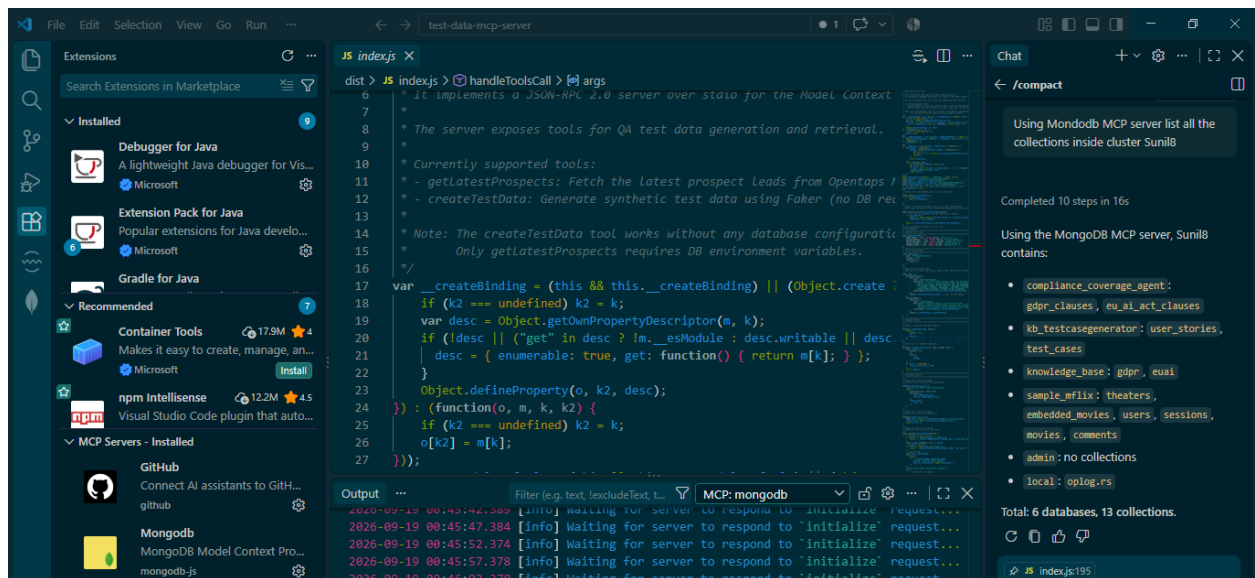

3. Drop the collection MCPMONGOC1 and confirm.

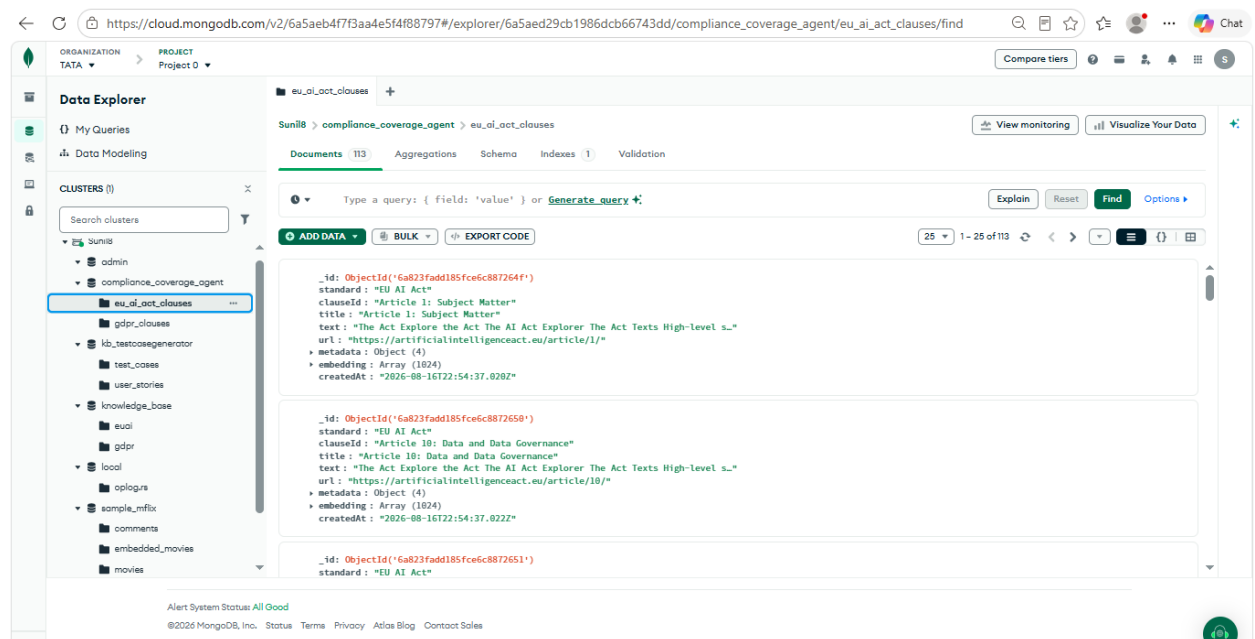

Cross validating it in Mongo DB and could see collection dropped.

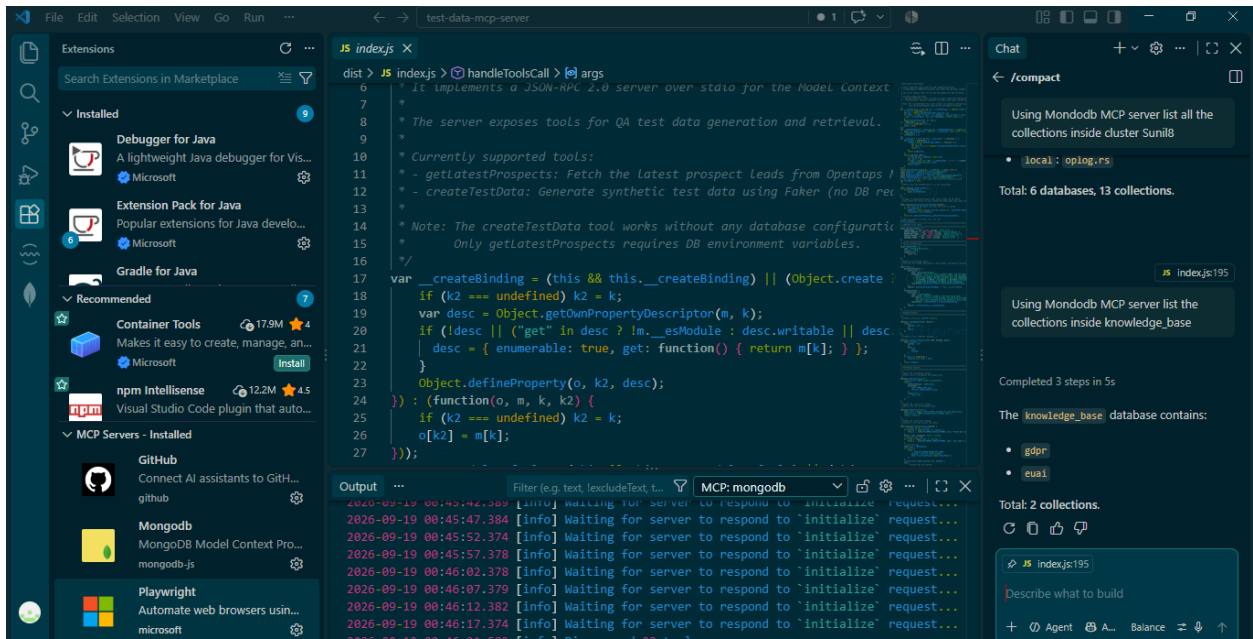

4 and 5. List collections and Databases

Cross validation from Mongo DB

Now just listing one collection from a database.

Now cross verifying inside Mongo DB MANUALLY
